What about Medicare Part C and the differences?

Medicare Part C plans are also called Medicare Advantage Plans. These plans are offered by private insurance companies that have been approved by Medicare. If you join a Medicare Advantage plan, you will still have Medicare, but you get your Medicare coverage (both Part A - Hospital Insurance and Part B - Medical Insurance) from that insurance carrier. There are usually varying, additional premium costs involved with Medicare Advantage Plans.

What is Medigap insurance?

Medigap insurance is Medicare supplemental insurance provided by private insurance companies to help cover some of the costs not covered by Medicare (such as the 20% co-insurance).

You have a six-month open enrollment period to buy a Medigap policy. The period starts the month you turn 65 and are enrolled in Part B. You have a guaranteed right to buy any Medigap policy sold in your state regardless of your health status during that time. If purchased after the initial enrollment period, however, the insurance company can require underwriting, set waiting periods for pre-existing conditions, different terms or premiums, or may not accept your application at all.

What if I'm still working?

If you or your spouse is still working and has insurance through your employer, contact your benefits administrator to find out how your insurance works with Medicare.

What about Medicare Part D?

Medicare Part D is prescription drug coverage. There are two ways to get Medicare Part D - either through adding a Medicare Prescription Drug Plan (Part D/PDP), or getting a Medicare Advantage Plan (Part C) such as an HMO or PPO that offers Medicare prescription drug coverage included in the plan.

Note that costs will vary depending on the plan you select. There may also be additional charges based on your income. Note that when purchasing Medicare Part D, the following applies:

- Costs will vary based on plan choice
- If you do not apply for coverage when you first become eligible, there may be a penalty
- There may be an additional charge depending on your income (see below)
- You can change your plan during the Annual Coordinated Election Period (October 15 – December 7 each year)

What is the coverage gap and how does it apply for Medicare Part D?

Most Part D Medicare prescription programs have what is called a "donut hole," or coverage gap. This means that after total retail costs for your prescriptions reach \$2,850 (for 2014), you will be required to pay the full amount until you have paid a total of \$4,550 (for 2014). After you pay the amount in the "gap" your catastrophic coverage will kick-in and cover most of the additional prescription drug costs.

Effective in 2014, there is assistance available for individuals who reach the "donut hole." Those individuals will get a 52.5% discount on brand-name drugs and a 28% discount on generic drugs. You still receive credit for the full cost in meeting the "donut hole" exclusion amount.
